

2025 WPA & APA RULEBOOK

WPA AND AFFILIATE FEDERATIONS POWERLIFTING RULES

***January 1, 2025: Soft Gear Division (Slingshot) added to single event bench press only competition categories. Soft Gear Division: Soft gear bench cannot count towards a total for full power or push/pull. All brands are legal.**

*** Compression singlets such as Inzer Power Singlet (and other companies with similar compression singlets) are not allowed in raw divisions of APA or WPA Affiliate competitions.**

***Effective January 1, 2017: In order for records to be officially recorded and recognized a lifter must compete in the specific division he/she wishes to set a record in. In other words, if a lifter wishes to set a master record he must have competed in the master division in the event to set a master record. If a lifter enters a meet with the intent to set records in 2 divisions he must register in both divisions in order to set records in each division.**

General Rules

The WPA and affiliate federations (such as APA) recognize the following lifts. The lifts must be taken in the same sequence in all competitions conducted under WPA rules: 1) squat 2) bench press 3) deadlift 4) total (Total is the addition of the best successful attempt of 1, 2, and 3)

The winner of a category shall be the lifter who achieves the highest total. The remaining lifters shall be ranked in descending order of total. Lifters failing to achieve a total are eliminated from the competition. If two or more lifters achieve the same total, the lighter lifter ranks above the heavier lifter.

The WPA and affiliate federations recognize and register national/world records within the age categories described hereunder:

Open: 13 years upwards (no restrictions) Athletes of any age may compete in the Open class

Youth Program – Begins at age 8 and goes up to and includes age 12 – child 8 years, child 9 years, child 10 years, Sub-teenagers 11-12 years. * Male youth divisions also have additional 97.0 and 105¾ lb. weight classes

Teenage: 13-15, 16-17, and 18-19

Junior 20-23

Submaster 33-39

Master 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79, 80 and upwards

The APA-

WPA recognizes the following lifts for full powerlifting, which must be taken in the same sequence in all competitions conducted under WPA rules:

**Squat Unequipped or Equipped Divisions Bench Press Unequipped or
Equipped Divisions Deadlifts Unequipped or Equipped Divisions**

Total sum (sum of the three best attempt) Unequipped or Equipped Divisions

The APA and WPA affiliates recognize the following lifts for Strength Sports Division:

Curl Overhead Press

Bench Press

Competition takes place between lifters in categories defined by:

Sex Body Weight

Age

Raw divisions Equipped divisions

Unlimited Gear divisions Strength Sports divisions

TESTED or NOT TESTED

Officially recognized bodyweight categories

**Men: 97.0 only for child and disabled, 105³/₄ only for child and disabled, 114¹/₂, 123¹/₂, 132¹/₄, 148³/₄, 165¹/₄, 181³/₄, 198¹/₄, 220¹/₄, 242¹/₂, 275¹/₂, 308³/₄, SH
W**

Women: 97.0, 105³/₄, 114¹/₂, 123¹/₂, 132¹/₄, 148³/₄, 165¹/₄, 181³/₄, 198¹/₄, 220¹/₄, Unlimited

A lifter may apply for records only in the weight class or he/she competed in. if a person is in a lighter category such as the 132¹/₄ class he/she cannot attempt to set a record in the 148³/₄ class. If the contest has no age categories the lifter may still apply for a record if he meets the age criteria for the record.

All records including World, National, State, etc. are posted online. If there are questions pertaining to accuracy of a particular record please contact the appropriate listed chairperson who is in charge of that set of records, i.e. state chairperson etc.

Note: A lifter may travel to an out of state event and set records for the state he/she officially resides in. However, the lifter may not set records for the particular state the event is held in.

In order for records to be officially recorded and recognized a lifter must compete in the specific division he/she wishes to set a record in. In other words, if a lifter wishes to set a master record he must have competed in the master division in the event to set a master record.

If a lifter enters a meet with the intent to set records in 2 divisions he must register in both divisions in order to set records in each division. The same applies to all other divisions i.e.

Police/Fire, Military, Veterans divisions etc.

Rounds system: Only the round system shall be utilized. Each lifter takes his first attempt in the first round. The lifter takes his second and third attempt in the respective rounds even though any of these may have been unsuccessful in the previous rounds.

If the lifter misses an attempt due to a misloaded bar or error of a spotter provided by the meet director, the lifter will be granted another attempt at the same weight at the end of the current round. The bar must be loaded on a progressive basis during a round from lightest to heaviest.

The lifter is never allowed to take a lower attempt on his next lift in the following round.

Lifting order is determined by the weight on the bar. Each lifter must give starting weights for all three lifts at the weigh-in. The lifter is allowed to change, “but only once”, the first attempt for each lift.

If he is in the first group this weight may be changed up to 5 minutes before the first round for that lift. If he is lifting in the following group, the weight may be changed up until the time when not less than 5 attempts remain for the previous group. An exception to this rule is the deadlift, where the lifter may change his attempt up until the point that the lifter's name is called as being in the hole.

Groups/Flights are formed at a rate of not more than 17 people in each group for geared lifters or not more than 22 RAW lifters. If the group is a combination of geared and raw lifters up to 22 lifters may be in a group if not more than 3 of those lifters are wearing gear. If more than 3 are in the group/flight the size limit for the group will be 17 maximum.

All squat rack heights should be given prior to warm ups.

Permitted weight use competitions at any level may be conducted in either pound or kilo sets.

Special rulings for middle school, high school, novice, Special Olympics, and prison competitions:

Lifters in the competitions/divisions listed below may wear shorts and tee shirt instead of the standard one piece lifting suit:

In prison meets however, if they are going to apply for a national or world record a one piece lifting suit must be worn. Those lifting in a novice division and wearing shorts and tee shirt may not set records. Middle school and High School students may wear shorts and tee shirt at school meets and/or local level meets which offer high school or middle school divisions. At all meets that are state level or above they must wear a standard lifting uniform.

Special and Disabled Lifters:

The APA and WPA have a decade's long history of accommodating any special needs or requests for disabled lifters. If a disabled lifter has any special requests please contact us before the meet so we may assist you and obtain a thorough understanding of your particular situation. Our organization has 3+ decades of experience in this area and have come across most scenarios that other federations have not.

Standard weight classes will be used for men and women.

A lifting suit of singlet is not required during the bench press if a lifter does not have the use of his or her legs. A t-shirt is suitable and tight fitting track trousers or shorts are acceptable.

Lifting with prosthesis and orthotics with shoes is permitted.

If the lifter has anatomical deformation of the elbow and cannot fully stretch the arms this fact must be reported to the three referees before the beginning of each attempt during the event.

If due to neurological or neurological affliction the lifter cannot fully stretch his legs, this fact must be reported to the referees before the start of each attempt.

The lifter will be allowed to be strapped to the bench with a strapping belt. Strapping from the ankles to the hips is allowed.

Coaches are allowed to help the lifter on arrival or departure from the platform. Coaches shall remain within the designated coaches area at all times during the performance of the lift.

Disabled lifters are allowed two minutes instead of the standard 60 seconds in which to start his attempt after being called to the platform.

The lifter must lie on his back. Shoulders and buttocks must be in contact with the flat bench surface. This position must be maintained throughout the attempt. The only exception is the heels in the case of lower limb amputees.

Age categories: Lifters must compete in their own specific age categories or the open division. An exception to this rule is a master lifter may compete in lower master age brackets if he/she wishes to compete against younger master athletes but may not set records outside of their age division.

Blood Management

All injuries must be treated and bandaged prior to an attempt. Blood or open wounds are not permissible on a lifter who is on the platform. The lifting will be stopped and the bar or equipment which came in contact with blood shall be sterilized with a bleach solution. It is the responsibility of the competition promoter to have a bleach solution present on the platform.

It is the lifters responsibility to correct the problem before continuing or beginning the lift if the lifter appears on the platform with an open wound or is bleeding. The time clock shall remain running. If the lifter cannot correct the problem before time runs out the lifter shall forfeit the attempt.

Announcer/Speaker Responsibilities

Arranges attempts chosen by the lifters in an orderly fashion based on weight in the bar and flight numbers. The speaker is responsible for efficiently running the event.

Announces the weight required for the next attempt and the lifters name. Announces who is in the hole, who is on deck, and the lifter up. In the hole means number 3 out, on deck means number 2 out.

The head referee will indicate when the bar is loaded. The announcer will then announce the bar is loaded and will call the lifter to the platform.

Under no circumstances will the speaker ever announce that a lift looks good to him/her or make similar statements while announcing.

It is the speaker's responsibility to announce deadlines regarding the rounds system and when the time limit is approaching for changing first attempts.

Timekeeper responsibilities are as follows:

The timekeeper is responsible for accurately recording the time lapse between the announcement that the platform is ready and the lifter starting his attempt.

He is also responsible for recording time allowances whenever required, e.g. after an attempt the lifter shall leave the platform within 30 seconds. The only exception to this rule is if a lifter is having his equipment checked after a record breaking attempt.

Once the clock is running for a lifter, it can only be stopped by the completion of a time allowance, by the start of a lift, or at the discretion of the Head Referee.

Consequently, it is of great importance that the lifter or his coach check the height of the squat and bench racks prior to being called, as once the platform is announced as being ready, the clock will be started.

Any further adjustments to the racks must be made within the lifter's one-minute allowance.

Scorekeeper responsibilities:

Scorekeepers are directly responsible for recording the progress of a meet. Scorekeepers are responsible for structuring lifting flights and compilation of final scores through the use of score keeping software whenever possible. This includes accurate recording of lifters information such as bodyweight, weight class, age, divisions entered, etc.

Event Music:

If music accompanies the lifting the volume should be controlled in such a manner that the lifter can hear the referee commands and announcements the speaker makes. It should terminate or be turned to a very low level in which referee commands can be heard by the lifter and those officiating. Determination of volume levels should be made prior to the start of the competition by those officiating at the event.

Alcohol & Substances:

The use of alcohol and other drugs by a lifter during a competition is prohibited. If an official witnesses a competitor consuming alcohol or any recreational drug during the event the lifter will immediately be disqualified from the competition.

Drug Testing:

If a meet director is running an event with drug tested divisions it is his responsibility to order drug testing kits well in advance to ensure that all required testing materials and quantities are available the day of event. Any Meet Director who conducts a competition offering drug tested divisions and fails to perform the required drug tests will be ineligible to hold events offering drug tested divisions for a period of 12 months.

Testing must be performed on all lifters who achieve a Schwartz/Malone score within the top 10% of competitors on each day of competition at any event exceeding 25 registered lifters.

All tests must be administered immediately after lifting is over and must be conducted by an APA or WPA official of the same sex.

Testing is to be performed by urinalysis. Meet directors may contact the WPA or APA headquarters for further information regarding drug testing procedures and ordering drug test kits.

An athlete can apply for participation in two divisions at the same time within the same competition - tested and untested. Such an athlete must undergo a testing procedure

WPA & APA Weigh-in Guidelines

Weigh-in sessions may not be held prior to 24 hours before the starting time of any competition.

The weigh in must be carried out in a designated weigh in room, or behind a privacy partition, with only the competitor, his coach and designated weigh in official present. All lifters will be weighed in by an official of the same gender.

All lifters (male or female) must be weighed-in by an official of the same sex. They may weigh in nude or in underwear, or as an option the lifter may wear their singlet. The lifter may wear socks while weighing in if he/she wishes

The scales shall be placed on a hard, flat surface and not on carpet or another soft surface during weigh-ins.

The scale must be accurate to the tenth of a kilo. All weights must be recorded to the tenth of a pound.

When possible, there should be two or more weigh-in officials attending each session. One official should handle the weigh-ins and obtain the lifters openers and rack heights. If a lifter desires to use foot blocks during the meet, this should also be noted at this time.

A designated official should handle the APA membership renewals. Lifters may not compete without a current membership.

Competitors in all divisions other than Open class must show a valid, government issued ID which verifies age with photo such as driver's license, passport, or other government issued photo identification card.

Gear checks must be performed which include inspection of singlets, wrist and knee wraps or sleeves, tee shirts, underwear, belts, shoes, and socks.

All weigh in sessions will last a minimum of one and a half hours. The exception to this is the early morning session the day of the meet which may be as short as one hour duration.

During the weigh-in sessions, a weight class limit sheet should be located near the scale as a reference.

Equipment and Specifications:

Platform must be large and secure enough to assure safety for the lifter, spotters and loaders. Boundaries shall be clearly marked for the knowledge of coaches and officials. This is the area in which there can be no coaches or spectators. No one is allowed on the platform except the lifter, designated spotters/loaders and referee's. Coaches do NOT belong on the platform. Other officials are allowed in the platform area as designated "as need arises".

Bar and Discs: All bars must be of the Olympic style and not the standard 1 1/8th type. A

Power Bar such as Texas Power Bar or Ohio Power Bar must be used. Although not required, specifically designed squat, deadlift and Bench press (25 kg) bars may be utilized but must conform to allowable range of dimensions listed in bar specifications.

The bar shall be well knurled or grooved and conform to the following: total length shall not exceed 7.5 feet with distance between collar faces not less than 4.27 feet or more than 4.76ft. Diameter of bar shall not exceed 30mm. or be less than 27.5mm. An exception to this will be the squat in which an 8 foot squat bar may be used instead of a 7.5 ft. bar. (All lifters in an event must use the same bars for each specific lift).

Discs must be used in the following range: 100lb, 45, 35, 25, 10, 5, and 2½. (55 lb. plates may also be used when/if available). For record purposes lighter discs may be used on a 4th attempt to achieve a weight of at least 1 pound more than the existing record. Discs must be clearly marked and loaded in the sequence of heavier discs innermost and smaller discs in descending weight arranged so the referees can read the numbers on each disc. The first and heaviest disc on the bar must be loaded face in, with the rest of the discs loaded face out as the weight is loaded.

Collars: shall always be used and shall be tightened snug to the discs. Collars shall be used on the outside of the plates only. They must weigh 5 pounds except when using the special squat bar, in which case they may be lighter.

Squat racks: shall be adjustable to accommodate the lifters. ER Style or Hydraulic racks must be capable of being secured at required height by pins. The monolift is allowed but

not a requirement for competitions.

Referee Lights: a system of lights or flags shall be provided whereby referee's decisions are made known. White represents a good lift, red represents a bad lift. 2 white lights is a good lift and two red lights is a bad lift.

Bench: the bench shall be sturdy for maximum stability and conform to the dimensions specified below:

Length not less than 4 feet and shall be flat and level Width between 11.0 to 13 inches

Height 16 to 19 inches measured from floor to top of padded surface without being compressed or compacted.

Benches shall have uprights 32-39 inches from floor to bar rest position. Maximum width between insides of bar rests shall be 3ft 7 1/8 inches

Under no circumstances will a lifter be allowed to bring his own personal bench, bar, or other lifting equipment for use with his lifts only. Any equipment to be utilized for the competition will be determined before the contest and it shall be the same equipment that all competitors use.

Lifters Costume and personal equipment:

Costume (suit)

Bench press competition: One piece lifting suit, lifting singlet or wrestling singlet.

Powerlifting competition: One piece lifting suit or singlet as described shall be worn except special divisions previously outlined in this lesson.

Deadlift competition: One piece lifting suit, lifting singlet or wrestling singlet.

General rules:

A tee shirt may be worn with short sleeves or no sleeves. Sleeves cannot cover the elbow. Follow the rules of hygiene and respect for other lifts T-shirt MUST be worn while performing the squat and bench press. Pocket is allowed on shirt but nothing may be in pocket.

Women may wear protective briefs or panties and also a bra provided it does not contain wire or support. Bench press shirts and deadlift shirts are allowed. Shirts made of canvas are only permitted in the “unlimited gear division”.

The lifting costume shall consist of a one-piece lifting suit of one-ply stretch material. Lifting suits made of denim or canvas and any double ply thickness suits are allowed only in the “unlimited gear division”. The straps must be worn over the shoulders at all times while lifting in competition. Length of the leg must not exceed 15cm from the middle of the crotch. Measurement is taken on a line from the top seam of the crotch down the inside of the leg. Lifting suits may be up to double layer thickness in standard divisions. Cover patches are not permitted to cover any seam area. A maximum of 2 cover patches is allowed. Cover patches may not exceed 4 inch length and 2 inch width. Cover patches may not be intertwined and may not overlap each other!

Cover patches must be of the same material as the item they are repairing. Cover patches must only be used to repair torn material and not to provide extra reinforcement in any area.

Socks must be worn and shall be of such a length that they cannot touch any knee wrapping or one piece knee cap supporter when in use.

During the execution of the deadlift long socks that cover the shin, but do not touch the knee must be worn.

They can be of any color or colors and may have manufacturer's logos.

They shall not be of such length on the leg that they come into contact with the knee cap supporter if worn.

Full length leg stockings, tights or hose are strictly forbidden. Shin length Socks must be worn to cover and protect the shins while performing the dead lift.

Light protective guards between sock and shin may be worn.

Duct tape may never be worn in place of a knee sock, but may be worn under the sock as a shin guard as long as all duct tape is covered by the sock

Hats: hats and caps with visors are not permitted nor are hats/caps with any piece of material hanging behind the head. Small caps such as wool caps that do not extend on to the neck or obstruct the eyes are permitted for the squat and bench press. Hats with visors are only allowed for the deadlift.

Emblems and logos are allowed to be worn, provided that they are not profane in any way and do not offend any particular group of people or culture.

Belt: a lifter may wear a belt provided it is no more than 4in width or 1/2in thick and shall contain no additional padding, bracing or supports of any material, either on the surface or concealed within the laminations of the belt. The belt must be worn on the outside of the lifting suit. The main body shall be made of leather or vinyl in one or more laminations which may be glued and/or stitched together. It shall not have additional padding, bracing or supports of any material on the surface or concealed within the laminations of the belt.

LEGAL BELT

NOT LEGAL

Foot attire: shoes must be worn. Footwear more substantial than basic socks must be worn. Metal cleats or spikes are forbidden. shin guards are now allowed to be worn during the performance of the deadlift, however, they must be worn "under" the lifters socks and no lubricant or foreign substance may be applied to them.

Knee wraps: must not exceed 3.5 meter length or 3 inches width. Elasticized knee cap may be worn. A combination of the two is forbidden. When the knees are wrapped the wraps cannot extend beyond 5.9 inches above the center of the knee joint or 5.9 inches below the center of the knee joint for a total of 11.81 inches. The fabric material shall be an elastic weave primarily consisting of polyester, cotton, or medical crepe singly or in combination.

Wrist wraps: wrap around style may contain a thumb loop. Wrist wraps cannot extend beyond $3 \frac{15}{16}$ inches above and $\frac{3}{4}$ inch below center of wrist joint. The thumb loop may now be worn during the performance of the lift if the lifter so desires. The loop must be the standard loop that comes with the wraps and not an insert sewn on by the lifter. The loop may not in any way be utilized to wrap around the bar or otherwise used for the lifter to obtain leverage during the performance of a lift. Wrist wraps shall not exceed 3ft, 3in length and 3.3 inches width. Alternately, wrist bands may be worn but may not exceed 4 inches width. A combination of the two is forbidden.

Wraps are only allowed on the wrist or knees. only wraps of one ply commercially woven elastic that is covered with polyester, cotton or a combination of the two, or medical crepe are permitted.

Rubberized substitutes are not allowed.

Elbow Wraps – Wraps may be worn only during the Squat and Deadlift competition but not during the Bench Press. They may cover the general elbow area but cannot extend to the wrist or shoulder. They may be supportive sleeves of rubberized material or elastic wrap, but must be of one single unit only, and be one meter or less in total length.

Equipment containing Kevlar is not allowed in standard divisions!

Plasters (bandages): two layers of plasters, bandages or band aids may be worn over the thumbs but nowhere else without official permission of the referee's. They may not be used as a strap to help the lifter hold the bar. No bandage can extend to the back portion of the hand on an injury to the inside of the hand. The referee may prohibit the lifter from any further lifting if he feels the lifter should not be lifting with any injury. If no medical personnel are available the referee has jurisdiction over the use of spot plasters.

Gear equipment check will be conducted during lifter weigh-in sessions. If the lifter appears on the platform with a major equipment violation that appears to be deliberate, he/she will be disqualified from the event. If a lifter bleeds on the platform or equipment the meet shall be stopped until the area/equipment in question has been cleaned with bleach or a strong disinfectant.

Approved gear: WPA affiliate federations do not keep an approved gear list due to the constant introduction of new gear and the reluctance of most gear companies to inform us when they have a new product on the market. Unfortunately, we see many of these products for the first time at a meet. We do not ban any gear companies from our organization. As long as the product meets the legality issues clearly outlined in this section it shall be allowed.

Unlike some organizations, we do not charge gear companies to have their products approved by our organization.

Shin guards are allowed to be worn during the performance of the deadlift, however, socks must be worn over the shin guards. Shin guards without socks are not allowed. Shin guards must not extend to a point higher than the lower border of the patella and not lower than the superior border of the ankle joint.

Lifting suits and bench press shirts, and all platform attire may consist of only one material. Shirts and suits may not consist of a combination of two materials unless lifting in the unlimited gear division, i.e. a bench press shirt may not consist of one layer of denim and a layer of polyester

Full length leg stockings, tights, leggings of any sort or hose are strictly forbidden.

Foreign substances: Foreign substances cannot be applied to platform or equipment. Spray stick-um, and chalk may be applied to the lifter or his uniform only. Oil, grease, and other lubricants on the body, costume, or personal equipment is prohibited. Only powder is allowed.

Powder includes chalk, talc, resin, magnesium carbonate, baby powder, or pool hall block chalk.

The lifter is not allowed to throw ammonia capsules when using them near or on the lifting platform.

Undergarments:

Standard Gear Divisions: boxer shorts are not allowed. Standard commercial athletic supporters or standard commercial under shorts of any mixture of cotton, nylon or polyester may be worn under the lifting suit. However, the garment cannot have legs and cannot extend down over the lifter's thighs. Standard length grooved briefs are allowed but must meet the specifications

outlined in this paragraph and must be single ply thickness. Groove briefs must be made of polyester material only. Custom made grooved briefs are not allowed. A lifter may not wear spandex bike shorts under a lifting to suit. Spandex bike shorts are not considered to be underwear.

Unlimited Gear Divisions: Any material may be worn and longer than standard cut groove briefs are permitted such as power pants etc. A pair of briefs of any design may be worn, provided that the length of the legs does not exceed mid-thigh, and that the waist does not extend beyond the mid-torso area. The briefs must be an individual article of cloth fabric. The construction may consist of multiple plies to any thickness but must, as a whole, be a singular component. Athletic supporters are permitted under the briefs.

Raw Divisions: A lifter may not wear spandex bike shorts under a lifting suit. Spandex bike shorts are not considered to be underwear. Boxer shorts are not allowed. Standard commercial athletic supporters or standard cut under briefs underwear of any mixture of cotton, nylon or polyester may be worn under the lifting suit. However, the garment cannot have legs and cannot extend down over the lifters thighs. Standard cut briefs underwear is otherwise known as tidy whites.

This is the style underwear that is legal in RAW and STANDARD GEAR DIVISIONS. Boxer shorts and Spandex bike shorts are NOT LEGAL.

Lifting Suits and Gear:

Standard Gear Divisions: Canvas and denim material lifting suits are not allowed.

Unlimited Gear Divisions: Canvas material of any thickness is allowed. It must be an individual full length article of cloth fabric. Its construction may consist of multiple plies to any thickness but it must be a singular component. The straps must be worn over the shoulders at all times while performing a competition lift. The length of the leg must not extend beyond mid-thigh (medial point between crotch and top of kneecap). Women may wear a one-piece suit of comparable design to the lifting suit. Leotards with sleeves or high cut leg lines are not permitted.

Bench shirts:

Standard Divisions: Bench shirts may be of single ply thickness polyester or denim material but not a combination of the two. A tee shirt or undershirt cannot be worn under a bench shirt.

No combination of 2 shirts may be worn. Female lifters are allowed to wear a bra or sports bra under a bench shirt. Bench press shirts may not be double or triple layer thickness nor may they be made of canvas material. Velcro/open back shirts are allowed. If the lifter is wearing an “open back” bench shirt the front and side deltoids must be covered and the shirt may not be pulled down in front to expose pectorals within one inch of the nipple area of the chest.

Unlimited Gear Divisions: Bench Shirts made of multi-ply thickness consisting of polyester, denim, or canvas may be used and/or a combination of the materials. Velcro/open back shirts are allowed. If the lifter is wearing an “open back” bench shirt the front and side deltoids must be covered and the shirt may not be pulled down in front to expose pectorals within one inch of the nipple area of the chest.

Raw Powerlifting:

The following equipment rules apply to lifting in Raw divisions:

Squat: Wrestling singlet and tee shirt. Lifting Belt, Wrist Wraps, and Knee wraps are allowed for joint protection. Compression singlets such as Inzer Power Singlet (and similar compression singlets) are not allowed in raw divisions of APA or WPA Affiliate competitions.

Bench Press: A Wrestling Singlet with tee shirt or tank top must be worn. Shoulder straps must be over teen shirt – NOT UNDERNEATH. Wrist wraps allowed.

Deadlift: Tee shirt, No shirt, or tank top and wrestling singlet, deadlift socks. Lifting belt, wrist wraps and knee wraps are allowed.

The Powerlifts and Rules of Performance

Squat:

The lifter shall assume an upright position with the top of the bar not more than 1 inch below the top of the anterior deltoids. The bar should be held across the shoulders with the hands and/or fingers gripping the bar and the feet flat on the platform with the knees locked

After removing the bar from the racks the lifter must move backwards to establish his position (unless using a monolift type device). The lifter waits in this position for the center referee's signal which is given as soon as the lifter demonstrates control with the bar properly positioned. The signal is a downward movement of the arm and the verbal command "squat".

Upon receiving the signal, the lifter must bend the knees and lower the body until the top of the thigh at the hip, is lower than the top of the knee (picture). Locking and unlocking of the knees after the signal is not defined as a descent, however, the knees must be locked at the start and completion of the lift. Only one descent attempt is allowed

The lifter must recover from the deepest point without double bouncing or any downward movement (stopping is allowed), to an upright position with the knees locked. When the lifter demonstrates control the referee gives the command to "rack" (replace the bar).

The signal to replace the bar is a backward motion of the hand and the verbal command "rack". The lifter must make a bonafide effort to replace the bar. This is defined as a step towards the racks. After this the lifter may receive aid in replacing the bar.

An exception to this rule would be if a monolift is being used the lifter obviously wouldn't need to take a step towards the racks. If the lifter drops the weight after

making a bonafide effort to replace the bar he will be granted the attempt. However, if the lifter deliberately dumps the bar or walks out from under the bar leaving the spotters holding the bar, the lifter will automatically be disqualified for jeopardizing the safety of those on the platform.

The lifter shall face the front of the platform.

Not more than 5 or less than 2 spotters permitted on the platform.

The lifter is allowed to enlist the aid of the spotters in removing the bar and walking out with the bar. However, when the lifter has established his starting position to perform the lift the spotters may not assist him with regard to holding weight while foot positioning, bar positioning, etc. is established. Monolifts are also allowed for the squat. These rules have been established for the lifters safety.

If the lifter is using meet provided spotters and not his own, and an error is made by a spotter which causes failure of his lift, he will be given an additional attempt. the lifter may request that he be allowed to use his personal spotters rather than meet spotters if he wishes, however, he will not be granted an additional attempt if his own spotters cause him to miss a lift!

The lifter cannot hold the collars, sleeves, or plates during the performance of the lift. The edge of the hands gripping the bar may come in contact with the inner surface of the collar however.

The lifters feet cannot make contact with the metal on squat racks or monolift.

Causes for disqualification of a squat:

Failure to observe signals at the commencement and completion of lift Double bouncing or more the one recovery attempt at bottom of lift

Failure to assume an upright position with knees locked at start and finish of the lift
Failure to obtain proper required depth in performance of the lift
Changing position of the bar on shoulders after the lift has begun

Shifting the feet forward, backwards or laterally during the performance of the lifts with the exception of rocking the feet between the ball and heel.

Contact with the bar by spotters during the lift except during a safety issue or accidental contact if the referees feel it did not make the lift easier.

Contact of the elbows or upper arms with the legs

Failure to make a bona fide effort to return the bar to the racks Intentionally dropping/dumping bar or walking out from under bar when the Spotters grab the bar

Placing the hands over collars, sleeves or plates.

Bracing/touching the feet against metal on squat racks or monolift Bench Press:

The front of the bench must be placed on the platform facing the center referee

Lifters starting position is with the back of his head, shoulders and buttocks in contact with the flat bench surface. His shoes must be on the floor

Plates or blocks not exceeding 18cms height may be used to build up the surface of the platform, but some part of the foot must remain in contact with the surface. If blocks are used they shall not exceed 45cms by 45cms.

Not more than 4 or less than 2 spotters/loaders shall be in attendance. The lifter may obtain help from the spotters in removing the bar from the racks. The lift off must be to arm's length and

not down to the chest. The lifter may utilize his own spotters and hand off person if requested.

The spacing of the hands will not exceed 31 7/8 inches (81 cm) measured between the forefingers or in the case of a reverse grip lifter, the measurement is between the little fingers). After receiving the bar at arm's length, the lifter lowers the bar to his chest and awaits the referee's signal which is a verbal command of "press". Adjustments can be made without penalty "before" the command.

The signal to press is given when the bar is motionless on the chest area (defined below) and under control. the bar must touch no lower than two inches below the base of the sternum/breastbone) after the press command is given the bar is pressed upward to straight arm's length and held motionless until the audible command "rack" is given. Please note that the 2 inches below base of sternum rule is at the referee's discretion. It is not expected that this distance be measured and it is understood that it is very hard to sometimes make an accurate determination when a lifter is wearing certain gear. The 2 inch below sternum definition is a general guideline and is basically a common sense rule. Obviously if the bar is down to the lifters belly it is farther than 2 inches below (in most cases 8-12 inches) and is a "safety issue".

The bar is allowed to stop in its upward movement but no downward movement is permitted Head movement is allowed. This includes turning or raising the head.

Foot movement is allowed within reason. This includes rising on toes or heels. The feet cannot leave the floor. Shuffling of the feet is not allowed.

After the command to press is given the buttocks must remain on the flat bench surface. As long as some portion of the buttocks remains on the bench and a side referee cannot see straight through the lift is permissible. If a referee can see under the buttocks he shall give the lifter a red light.

If the lifter does not want a hand-off and chooses to lift the weight off himself, he does not have to start off at straight arm's length but may go straight down to the

chest if he wishes. The lifter may utilize his own hand off person. However, he/she must inform his hand off person to clear the area in front of the center referee. Failure of a handoff person to clear the area in front of referee can result in disqualification of the lift.

There can be no downward motion of the bar after the press command has been given, not can there be a major change in the arch of the back. If the lifter has sunk the bar into his chest before the press command has been given it is permissible, however, further sinking into the chest after the command is given is not allowed.

Major uneven extension of the bar at the completion of the lift is not allowed (except in a proven, medically documented disability). In the case of medical disability the lifter must furnish documentation signed by a medical doctor substantiating the disability.

Deliberate contact with the bar and the bar rest uprights is not allowed. If it is obvious that the contact was not deliberate and did not assist the lift the attempt will be granted to the lifter.

The lifters feet may not come into contact with the upright supports of the bench

The sleeves on the lifters shirt cannot cover the elbow during the performance of the bench press.

Causes for disqualification of a Bench Press

Failure to observe the commands at the commencement and completion of the lift
Raising the buttocks off the bench surface

Heaving or bouncing the bar off of the chest or a major change in the arch of the back
4.sinking the bar into the chest area after the press command

Major uneven extension of the bar at the completion of the lift or pronounced, exaggerated uneven extension during the lift.

Downward movement of either hand during the uplifting

**Deliberate contact with the bar and bar rest uprights during the performance of the lift
Contact of the feet with the upright supports of the bench**

Contact of the bar by the spotters/loaders between the referee's signals

**Raising the foot completely off the floor or excessive shuffling movement of the feet
after the press command has been given**

**It is the responsibility of the lifter to inform his hand-off man to clear the area in
front of
the center referee immediately after the lift off. As this is a major safety issue, the c
enter referee may at his discretion tell the spotters to take the bar. If this occurs, th
e lift will be declared not good.**

Spacing of the hands exceeding 31 7/8 inches.

**If the lifter receives a hand off and does not begin at straight arm's length the lift ma
y be declared no good if the referees feel the violation was very flagrant**

Deadlift

Rules of Performance:

**The bar must be laid horizontally in front of the lifters feet, gripped with an optional
grip in
both hands, and lifted upward with one movement until the lifter is standing erect.
Stopping the bar is allowed but no downward movement is allowed.**

The lifter will face the front of the platform c) on completion of the lift, the knees shall be locked in a straight position and the lifter shall be standing erect. The shoulders will not be thrust back past the erect position although it is permissible if they are and all other criteria is acceptable.

The center referee's signal is a downward motion of the hand and the verbal command "down". The signal shall be given when the bar is motionless and the lifter is in the apparent finished position. There is no signal to begin the lift. The lifter begins the lift on his own when he feels he is ready.

Any raising of the bar or deliberate attempt to do so counts as an attempt. The lifter is allowed one pull per attempt only!

Causes for disqualification of a Deadlift

Downward movement of the bar during the uplifting

**Failure to stand erect with shoulders held in an erect position at the completion of lift
Failure to lock knees at completion of the lift**

**Stepping backward or forward during the performance of the lift
Lowering the bar before receiving center referee's signal**

Supporting the bar on the things during the lift in a manner that the lifter can obtain leverage (hitching)

Returning the bar to the platform without maintaining control with both hands

General Notations – In all lifts after the "rack" command is given in the bench press the spotters may guide the bar back into the racks. The same holds true with the squat. Once the rack command has been given the lift is officially over. This helps promote safety on the platform.

Weighing In:

The standard weigh-in session must be offered at all meets. It shall last for a duration of 1 1/2 hours, must begin at least 2 hours before the lifting starts, and end at least 1/2 hour before lifting starts.

Lifters must be weighed in the nude or underwear or may opt to weigh in wearing spandex shorts or lifting/wrestling singlet as a substitute for underwear. Females must weigh the female lifters and a male must weigh the male lifters. Lifters may not wear shoes or sneakers during weigh-in. At National or World level events meet directors have the option to extend weigh-ins but may not weigh-in competitors prior to 24 hours of the estimated starting time for a lifters class.

Illegal re-weigh: If a lifter enters a certain weight class, steps on the scales and officially makes weight within the upper and lower limits, he is not allowed to be re-weighed to make another weight class. In case lifters tie: if two lifters weigh the same at weigh-in and eventually tie in their totals, they shall be re-weighed.

The lighter lifter shall take first place and the heavier lifter second place. However, if they still weigh the same after the re-weigh, both lifters shall share first place and the person who would normally have placed third will still be ranked third and so on.

If two lifters tie for first place team scoring will be conducted by adding first and second place points and dividing them equally.

Order of Competition

The organizer appoints the following officials: speaker/announcer, marshals, expeditors, scorers, spotter/loaders, other positions as needed.

The speaker is responsible for the efficient running of the competition. He acts as master of ceremonies and arranges the attempts chosen by the lifters in an orderly fashion, announces the weight required for the next attempt, the rack settings and the name of the lifter.

When the bar is loaded and the platform is cleared for lifting, neat, tidy and safe, the center referee will indicate the fact to the speaker who in turn will announce that the bar is loaded and call the lifter to the platform, and tell the timer to start the one minute clock.

Once a clock is running for the lifter, it can only be stopped by the completion of a time allowance, by the start of a lift, or at the discretion of the center referee. It is of great importance that the lifter or coach check the height of the squat rack prior to being called as once the bar is ready, the clock is started and any further adjustments to the racks will be made within the lifter's one minute time allowance. The lifter is allowed one minute in which to start his attempt after being called to the platform. If he does not start his attempt within the time allowance, the time keeper will call time, the lift will be declared "no lift" and the attempt forfeited. When the lifter starts the lift within the time allowance, the clock will be stopped. If a lifter appears on the platform in violation of the uniform/equipment rules, the lifter shall be warned by a referee and will have whatever time is left on the clock to correct the violation and start his attempt. If this is not accomplished within the one minute time allowance, the timekeeper will call time and the lift will be declared "no lift".

In small competitions the lifter informs the speaker within one minute of completing his last attempt, and lets the speaker know what his next attempt shall be. In larger competitions the marshals/expeditors will have this responsibility. The marshal/expeditors will approach the lifter or his coach immediately after his attempt and request the weight required for his next attempt. If the lifter does not give his next attempt within one minute the speaker will be informed and the weight on the bar will be increased to the requirements of the next lifter in normal progression.

Scorers are responsible for accurately recording the progress of the competition, and on completing, ensuring that the three referee's sign the

Official score sheets, record certificates or any other documents which require signatures.

Spotters/loaders are responsible for loading and unloading the bar, adjusting squat racks or benches as required, cleaning the bar or platform at the request of center referee, and in general assuring that the platform is well maintained and presents a neat and tidy appearance at all times.

At no time shall there ever be less than two or more than five spotter/loaders on the platform. When the lifter prepares for an attempt, the spotter/loaders may assist in removing the bar from the racks, and also in replacing the bar after the attempt. They shall not touch the lifter or the bar during the actual attempt. The only exception to this rule is if the lifter is in jeopardy and likely to result in injury, either at the request of the lifter, the center referee, or when it is very obvious to the spotter/loaders that the lifter will most likely be injured if the lift is to continue. The lifter shall stay with the bar and aid in its replacement in the rack, unless the injury prohibits the lifter from assisting.

If the lifter is deprived of an attempt by an error of a spotter, and through no fault of his own, he will be granted another attempt if he wishes. The correction must be made at the end of the round. If the error occurs on the last lifter of the round the center referee shall assign a time for the lifter to retake his attempt. The lifter will be given ample time to recuperate before a retake of the attempt. Persons allowed on the platform: during the actual execution of a lift, only the three referee's, and the spotter/loaders are permitted to be present on the platform. Coaches shall not be allowed at the back or sides of the platform during the lift. Coaches must remain outside of the designated lifting area.

Adjusting equipment while on the platform: A lifter shall not adjust his costume or wrap within the vicinity of the platform. The only exception to this rule is that he may adjust his belt.

Progressive loading of the bar: The bar shall be loaded progressively. The lifter requiring the lightest attempt being first. The bar, except in rare situations cannot be reduced in weight once a lift has been performed with the weight announced. It is a necessity that the lifter or his coach observe the progressive loading of the bar and be ready for his attempt at the chosen weight.

Attempt priority rule: A lifter taking his first attempt must precede lifters taking their second and third attempts with the same weight. Also, a lifter taking his second attempt must precede lifters taking their third attempts with the same weight. All first attempts must be taken in round one, all second attempts must be taken in round two, and all third attempts in round three. Fourth attempts may be taken at the end of the third round. Fourth attempts may be taken for purposes of setting a world, national, regional, or state record. A fourth attempt is for record purposes only. It may not be applied to the total and considered as an attempt within the competition. A lifter must have successfully completed his/her competition attempts before attempting a record attempt.

Lifter will not be granted a 4th attempt if they were unsuccessful with any competition attempts.

Minimum amount of weight increase between successful attempts: In WPA recognized competitions the weight of the barbell must always be a multiple of 5 lbs. (2.5 kg).

The progression must be at least 10 lbs. between the first and second attempts and 5 lbs. between the second and third attempts. Special plates 1¼, 1 lb., ½ pound plates may not be used for standard attempts. They are to be utilized for 4th attempts only.

Exceptions to this rule:

A request for 5 lbs. between the first and second attempts indicates that the lifter does not want to take a third attempt.

Progression by 5 lbs. between the first and second attempts in the case of a female lifter during the bench press between her first and second attempt. Females must go by the standard weight increases for squats and deadlifts.

In record attempts made outside of the competition, the weight of the barbell must be at least one pound in excess of the current record. This record attempt must be taken in the normal sequence of increasing weight during the competition and not at the completion of lifting.

Loading errors or incorrect announcements by speakers:

If the bar is loaded to a lighter weight than originally requested and the attempt is successful, the lifter may accept the successful attempt or elect to take the attempt again at the weight originally requested. If the attempt is to be re-taken at the originally requested weight, the lifter may take the attempt at the end of the round to allow him/her sufficient recovery time.

If the bar is loaded to a heavier weight than originally requested and the attempt is successful, the lifter will be granted the attempt. However, the weight may be reduced again if required by the other lifters. If the attempt is not successful, the lifter will be granted a further attempt at the originally requested weight.

If the loading is not the same on each side of the bar, any change occurs on the bar or discs during the lift, or the platform is disarranged and the lift is not successful, the lifter will be granted a further attempt.

If a loading error occurs during the second attempt of a lift and the progression, because of this error is only 5 lbs., the lifter may accept the successful attempt and go on to his third attempt if he wishes, with no penalty for only making a 5 lb. jump. In WPA recognized competition the lifter shall not be penalized for an error of a meet official. If the lifter wishes to try the attempt again with the amount he specified, he will be granted an additional

attempt. If the attempt with the amount he originally specified is unsuccessful he will be given credit for the successful lift with only a 5 lb. jump.

If the speaker fails to announce a lifter at the appropriate weight, then the weight on the bar shall be reduced as necessary and the lifter shall be allowed to take his attempt.

Three unsuccessful attempts in any lift will automatically eliminate a lifter from the competition. If prior to being eliminated, a lifter has set a record in one of the other lifts and the proper officials were present, the lifter will be granted the record in that lift. He will not be allowed to continue with the competition however.

On completion of a lift, the lifter shall have 30 seconds to leave the platform. Failure to comply after being warned shall result in disqualification.

If a lifter suffers an injury and the referees or meet director feel the lifter should not continue lifting, he shall retire

General:

Any lifter or coach, who by reason of misconduct upon or near the competition platform is likely to discredit the sport, shall receive one official warning. If the misconduct continues the referees will disqualify the lifter and order the coach to leave the venue. This rule applies even if it is the lifter's last lift of the day at the competition. Any lifter who strikes an official or any other individual at a competition will be permanently banned from all WPA registered competitions (APA, CPA etc.). Any lifter who causes a disruption which seriously interferes with the efficient running of a competition, or interferes with lifters preparing for a lift, will be suspended from WPA registered competition for 3 years.

Any certified WPA referee who through his actions is obviously showing bias towards a lifter or partiality will be permanently suspended from being a referee and will no longer be certified. Under no circumstances will referees question judgment calls made by a

nother referee while on the platform. Referees must never argue among each other on the platform.

If a lifter assaults an official, competitor or spectator, the meet director shall notify the WPA in writing within 3 days of the incident. Written complaint should include the name and address of the lifter involved. The meet director is required to report any assault to local law enforcement authorities immediately and obtain a copy of the law enforcement agencies police report. A copy of this report shall be sent to the APA-WPA office within 24 hours. The lifter will be permanently suspended from the WPA and will not be allowed to compete in any event run by an organization registered with the WPA (such as APA or CPA).

All articles of lifter's costumes and personal equipment shall be clean, neat and presentable. At the discretion of the referee, a lifter will not continue in the competition if he/she does not conform to this standard.

Excessive "psyching up" such as hitting and swearing shall be limited at the referee's discretion.

A warning shall be issued if minor swearing was involved. If the offense was flagrant and intentional the lifter will be disqualified.

Videos will only be used to determine if the bar was misloaded. Under no circumstances will video review be allowed to change the judgement call of a lift. Video review is only allowed to determine if the bar was misloaded

Referees:

The referee's shall be three in number consisting of one center and 2 side referees. The center referee is responsible for giving the necessary signals for all three lifts.

The three referees may seat themselves in what they consider to be the best viewing positions around the platform for each of the three lifts. Referee's should position themselves in the best viewing position, and may have to lean, shift, or leave their chair to do so.

A referee should not ask a spotter to move to get a better view of the lift if by so doing it could in any way jeopardize the safety of the lifter. Lifter safety shall take priority over anything else.

However, the hands of the rear spotter may not interfere with the viewing of the top of the thighs at the hip joint during the performance of the squat.

Specific areas of responsibility of judging for referees: All three platform officials have the responsibility of judging all aspects of the lifters on the platform. The head referee, from

his position at the front of the platform, has a vantage point that makes it more difficult to judge some aspects of a lift, as compared to the side referee's. However, he does have the responsibility to judge all such aspects and is neither prohibited nor excused from making a judgment on certain aspects of a lift because his vantage point is not the same as side officials. Once the head referee has given the starting signal, it is recommended that he not leave his chair however he may do so if he so chooses in cases he deems might be necessary to do so.

Procedure when a referee is "blocked" out of viewing the lift in progress: If, during the lift a spotter unintentionally gets in the way of a referee's view of the lift so that he does not actually see the lift, the referee should give the lifter a white light, and the spotter be warned. The referee may leave the chair if he chooses to do so and thinks it will possibly improve his viewing of the lift, however this is "not" required.

Duties of the referees: Prior to the contest he should make sure the platform and equipment comply in all respects with the rules, the scales be working properly, assure that weigh-ins be conducted legally and proper, and assure a thorough rules briefing is conducted prior to the time that the lifting starts. During the contest he should make sure that the weight on the bar be loaded the same as the speaker announces.

All three referees should be issued loading charts. during the meet if any referee has reason to doubt a lifter's integrity in respect to intentional use of invalid attire or equipment to give the lifter an unfair advantage over other competitors, the referee shall call th

is to the attention of the other referee's and inspect the lifter. If the infraction is major the lifter shall be disqualified from the competition. If the infraction is minor the lifter shall be warned.

Procedure of a referee seeing a fault of the lifter or lift: He shall call attention to the fault. If the head referee or other side referee is in agreement, this will constitute majority opinion and the center referee will stop the lift at a discretionary safe point. He will then signal the lifter to "rack or down" and give the appropriate hand signal. Or he shall order the spotters to take the bar.

Procedure for a lifter to be informed of infractions which cause him to receive a red light: A lifter receiving a red light for a lift may (if he/she desires) approach a referee after completion of the lift and not during the commencement of the next lift, and ascertain why he/she received a red light. The referee shall inform the lifter as to why a red light was given. The lifter should not, however, approach and ask a referee why a red light was given, after several lifts have gone by following his/her own.

Non-influence of referee's toward each other: Referees may not veto or overrule each other.

A referee shall not attempt to influence the decisions of other referee's. There shall not be ranking of referees. All referees are equal. If a referee is partial towards a certain lifter or bias in his opinion and feels it will interfere with his judgment he will inform the other referees so he can be replaced while that lifter is lifting.

Acceptable referee communication: Referee's may consult with each other or any other official in order to expedite the competition, or to correct faults.

Proper Positioning of Side Referees during the Deadlift: From the line perpendicular from each lifter's side, the side judge should be located approx. 15' forward. This allows the best vantage point to assess downward movement at or between the hands, to assess leg assist, and to assess final position ensuring fully upright with knees locked. Under no circumstances should side judges be positioned to the rear of the lifter.

Referee dress code: Referee's should dress neat and appropriate. They shall not dress in a manner which will cause the public to view the sport in an unfavorable manner.

Referee Shirts can be ordered online at the APA products store at this url: <https://www.powerliftingproducts.com>

Referee Shirt Front Side Referee Shirt Back Side

Referees must officiate in at least one APA or WPA Affiliate federation meet each year to keep accreditation current. Any official that has not judged at least one competition within a 12 month period must re-take the written test to refresh them on all current rules.

Referees must silence cell phones while on the platform. Referees are prohibited from using cell phones while on the platform judging lifts. Speaking on phone, texting, etc. while officiating is not acceptable.

Flight size: the maximum number of lifters allowed in a geared lifter flight is 17 lifters and a raw lifter flight is 22 lifters. Flights should be divided as evenly as possible. As an example, if 40 lifters are competing in an event each flight #1 could have 13 lifters, flight #2 could have 13 lifters and the 3rd flight could have 14 lifters or a similar setup should be utilized. Flights may be composed of any combination of bodyweight categories at the discretion of the meet director or can be set up by starting attempts with lifters having lighter openers being placed in the first flights and subsequent flights being based on the same method.

If a contest is small and a group (flight) of lifters is less than 7 lifters a compensatory time allowance will be added at the end of each rounds as follows: For 6 lifters add 2 minutes, for 5 lifters add 3 minutes, and for 4 or less lifters add 3 minutes. 3 minutes is the maximum allowance permitted at the end of a round. If a group (flight) has 7 or more lifters no compensatory time shall be added.

Record Setting:

General conditions required for setting WPA, APA, CPA or affiliate records at world, continental, regional, and national championships sanctioned by WPA and affiliate federation's world records shall be accepted without weighing the barbell after the lift.

At this level of competition the barbell and discs must be weighed prior to the competition starting time. This will assure that the meet is run smoothly and efficiently without unnecessary stops during the competition.

Requirements for registration of world, continental, national and regional records are as follows:

The competition must be held under the sanction of the national federation affiliated with the WPA. All sanction request forms must be submitted to and approved by the WPA Headquarters at least 30 days prior to the event.

All of the adjudicating referees must hold a current WPA referee's card or they may be referees of national or international rank with the IPF, USPF, USAPL, CPU, or the AAU.

When using referees from the other federations listed they must be made aware of the minor rules differences that exist between the WPA and their respective federations. This will be done via a referee clinic held before the competition.

All referee exams must be sent to and will be graded by WPA headquarters.

The good faith and competence of referees of all members' nations is beyond dispute.

Consequently, a world or continental record can be assured by referees of the same nation.

Duel sanctioned meets are not permitted.

If a lifter competing in a full power meet sets an individual lift record but is disqualified from the competition because he failed to make the three attempts at another lift he will still retain the record he set for the individual lift provided the proper referees were present to validate that the lift was properly performed.

No fourth attempts for a record may be included in the total at a full meet or as an attempt within the competition at a single event meet. Fourth attempts are for record purposes only. The lifter by virtue of his lift may set a record total however.

The barbell and discs must weigh within 1% of their face value.

World records will be registered only after they are published on a central website WPA: <https://www.apa-wpa.com/APA/> and checked responsible for maintaining and fixing of World Records 1st Vice President of WPA.

Continental records will be registered only after they are published on a central website WPA: <https://www.apa-wpa.com/APA/> and checked responsible for maintaining and fixing of World Records 1st Vice President of WPA.

National records will be registered only after they are published on the website of the national representative of the WPA

If two or more athletes in the same weight class finish with the same result, then the record is assigned to an athlete who first came to the record weight. If during the competition in different cities, states, regions, or countries in the same day, if two or more athletes in the same weight class finish with the same result, then the record is assigned to both the athletes from the different areas.

World records can only be set at Federal (State), National (National Champ & Cup), Continental (like European, Asia etc. Champ or Cup), World Champ or Cup. At all other meets you can set state, regional and national records.

State Record Setting:

Lifters may not simultaneously set records in two different states. An example of this would be a lifter from New York travels to a meet in Connecticut. He can only set records for his state of residence (New York) while competing in the meet in Connecticut. If a lifter moves during the calendar year, he/she can set records for his/her new state after the move. At all times, records can only be set for the state the lifter is a full time resident in at the time of the event.

If a college student establishes legal residency in the state his/her college is located in, he/she has the option of registering in either their home state or the state that their college is located in.

Members of the Armed Forces have the option of registering in the state of their permanent residency or in the state of their military assignment.

How a Lifter may qualify for National Championships

- 1) All past APA/WPA National Champions (Raw) are automatically qualified all divisions.**
- 2) Place top 5 at the Nationals the previous year. Open divisions.**
- 3) Place top 5 at the Regionals within a calendar year. Open divisions.**
- 4) Place top 3 (any division) at a state level meet or has a class 1 or higher total from any meet.**

- 5) All Master and Teen that total in an APA/WPA meet within one calendar year.
- 6) Special invite, by meet director. This is for injuries and special circumstances.
- 7) For single lift just compete in an APA/WPA sanctioned event within one year prior
- 8) Qualify at an APA/WPA sanctioned event that is advertised as a qualifier within 1 year prior

Sanctioning competitions:

a) In order for a sanction to be granted the meet director or state chairman shall apply for the sanction at least 4 weeks prior to the planned event. Meets are sanctioned online at

<https://www.apa-wpa.com/APA/sanction-request-form/>. Sanction requests and bid propositions for all national, continental, and world level competitions should be submitted to WPA headquarters at least 6 months in advance.

b) Sanction fee must accompany the sanction request form. If a sanction request is denied, a refund will be sent to the meet director. It will be up to the discretion of the National office to

refuse a sanction if another APA event has been scheduled nearby on the same date

c) It is NOT required that meet directors run Raw or Unlimited Gear categories in their events. It is the meet director's option to run which categories they wish in their event. The basic men's open and women's open classes must be run. Men's Open division must consist of full weight classes.

All other divisions may be run with full weight classes or by Schwartz and Malone formulas.

The divisions that are run in a particular contest will be at the discretion of the meet director.

Formula utilized in WPA competition:

The officially recognized formula shall be the Schwartz formula for men and the Malone formula for women, and foster formula for master lifters over 40 years of age. The formula is utilized to determine the overall champion or placements in classes run by formula instead of weight classes.

Special rule for record setting at full power events: If a competitor competes in a full power meet with the intention of setting records at the event and bombs out at a particular lift in the event, he is no longer considered competing for a placing. However, the lifter may continue to participate in the other lifts for the purpose of setting records in those lifts if the proper officials are judging the event and if the lifter has secured the permission of the meet director. This is only allowed for the lifter who is attempting to set a record of some sort (not personal best attempts)

General duties & code of conduct for chairpersons, referee's and other officials:

- a) The chairperson shall maintain a set of accurate state records that must be made available to the lifters.**

- b) The state chairperson shall cause at least 2 APA sanctioned events to occur in his/her state each year. The chairperson does not have to be a meet director.**

- c) In the case of other persons directing a meet, the chairperson shall attend the meet to oversee the event and make sure it is properly conducted and shall provide the meet director with all necessary paperwork needed to get the event sanctioned and to run the event properly.**

The chairperson shall assist meet directors in obtaining certified referee's to officiate at their event. If the chairperson cannot personally attend a meet in his/her jurisdiction the chairperson shall appoint a responsible person who is well versed in APA policies and format utilized to run a legal competition.

The APA & WPA also have a Strength Sports Category which consists of the Overhead Press from racks and the Strict Curl. This section of the rulebook pertains to the rules of performance for those lifts.

STRENGTH SPORTS

Uniform Requirements:

All lifts will be performed RAW (no supportive gear). Wrist wraps, knee wraps, and lifting belt may be worn.

Uniform for Overhead Press shall be a wrestling singlet OR shorts (cut above the knee) and tee shirt.

Uniform for Strict Curl shall be a wrestling singlet OR shorts (cut above the knee) and tee shirt.

Strict Curl Rules:

The lifter shall face the front of the platform. The bar shall be held horizontally across the thighs with the hands palms of the hands facing outward and fingers gripping the bar. The feet shall be flat on the platform with the knees locked and arms fully extended. One foot may be in front of the other (legs staggered) as long as the knees are locked and feet are flat on the platform.

After he/she removes the bar from the racks, the lifter must move backwards to establish his starting position. The lifter shall wait in the starting position for the Head Referee's signal. The command is given when the lifter is motionless and the bar is properly positioned. The Head Referee's signal shall consist of an upward movement of the arm and the verbal command "curl".

When the curl command is given the lifter must bring the bar up to the fully curled position (bar near chin or throat with palms facing backward). The knees shall remain locked and the shoulders square or back throughout the entire lift.

At the completion phase of the lift, the knees shall be locked and the shoulders square or back.

The legs and hips may not be used in any way to generate momentum to complete the lift. Lifter may not lean back to assist in bringing the weight up. Any thrusting of the legs or hips is forbidden

When the lifter has reached the finished position the Head Referee's signal shall consist of a downward movement of the hand and the verbal command "down." The signal will not be given until the bar is held motionless and the lifter is in the finished position

When the bar is motionless, the Head Referee will give the signal to replace the bar. The signal to replace the bar will be a backward motion of the hand and the verbal command "rack."

Any rising of the bar or any deliberate attempt to raise the bar will count as an attempt.

The Lifter will be given an additional attempt at the same weight if failure in an attempt was due to an error if the bar has been misloaded.

Strict Curl uniform will be shorts and short sleeve tee shirt or tank top, or wrestling singlet.

Sleeves may not cover the elbow.

Causes for Disqualification of the Strict Curl

Any downward movement of the bar before it reaches the final position.

Failure to stand erect with the shoulders square or back.

Failure to, keep the knees locked and straight at during the lift.

Stepping backward or forward or rocking feet between ball and heel.

Lowering or racking the bar before receiving the Chief Referee's signal. Bouncing the bar off the thighs to start the upward motion

Using the hips, thighs or legs for momentum in completing the lift. Any rising of the bar or any deliberate attempt to do so will count as an attempt.

Overhead press uniform will be shorts and tee shirt or tank top, or wrestling singlet.

Sleeves may not cover elbow.

Overhead Press:

The bar is placed on squat racks set at lower frontal deltoid height. The lifter takes the bar out from this position (can walk back or remain in place) and establishes a starting position with knees locked and standing erect.

When the lifter is in the apparent starting position the center referee will say press and give an upward motion of the hand to indicate the lift has commenced.

The lifter presses the weight to straight arm's length, locks the elbows and waits for the down command which is given when the lifter is in the apparent finished position. Down command is given by the center referee and will be a verbal command "down" and a downward motion of the hand.

The lifter may not lean back or change the position of the back, not may he bend the knees during the performance of the lift, or do any other movement to help "thrust" the weight upward.

When the down command is given the lifter lowers the weight to his shoulders and racks the bar.

Causes for disqualification of the Overhead Press:

Leaning back when performing the lift to make the lift easier and arm stroke shorter

.

Bending the knees during the lift.

Pressing the weight before the press command is given, racking the weight before the rack command is given.

Downward movement during the uplifting phase of the lift.
